

About Me Hut Freeze Checklist - Final

Scenes Covered: Scene 20 (Favorite Food) and Scene 21 (Dreams and Wishes)

Generated: 2026-04-16 12:42

SCENE 20 - FAVORITE FOOD (Favoritefoodgame.jsx)

Phase Map

- intro
- food-choice -> food-correct -> color-choice
- color-choice -> color-correct -> activity-choice
- activity-choice -> activity-correct -> friend-choice
- friend-choice -> friend-correct -> child-intro
- child-food-choice -> child-color-choice -> child-activity-choice -> child-friend-input -> friend-celebration -> comparison-card -> complete

Reload Behavior - Preserve Progress Pattern

- Ganesha choice phases (food/color/activity/friend choice): reload restarts same phase, replays phase VO, and resets idle hints.
- Child phases: reload auto-advances only if prior sub-step is already complete; otherwise stays in same sub-step and replays VO.
- Modal states (food-draw, food-type, activity-draw, activity-type) are restored on reload with draft context.
- No resume popup is shown in Scene 20.

Tab-Switch Behavior

- Uses usePauseAwareTimeout.
- onHide: stops VO, pauses celebration, clears phaseVoiceRef for replay safety.
- onShow: resumes celebration, triggers return hint path, resets idle hints.
- Resume delay is 3000 ms.

Idle Hint System (Status: Partial)

- Hints are implemented for Ganesha choice phases only: food-choice, color-choice, activity-choice, friend-choice.
- idleHintLevel uses extended progression (0 to 6): none, wobble, glow, VO+pointer, sparkle, pulse, pulse.
- Timing: 6s wobble, 6s glow, 15s VO+pointer, 22s sparkle, 34s pulse, 46s pulse.
- Resets on interaction, phase change, and tab return.

Hooks Used

- useVoiceGuidance (idleTimeout=20s, resumeDelay=3000ms, enableMusic=true)
- usePauseAwareTimeout
- useResumeCountdown (countdown used, no popup UX in S20)
- useGameSounds
- useGaneshaVoice
- useAudioPreference

VO Checklist (Core)

- Intro opening line
- Food phase entry and food correct
- Color phase entry and color correct

- Activity phase entry and activity correct
- Friend phase entry and friend correct
- Child transition line
- Child food/color/activity/friend prompts
- Comparison card line
- Phase-specific idle hints for the 4 Ganesha choice phases

Asset Audit

- Ganesha foods: 3 items; kid foods: 7 items; colors: 8 items; activities: 6 items; animals: 3 items.
- UI includes draw canvas, keyboard/text input, comparison card layout.
- Primary scene assets include babyGanesha variants and fav_background.jpg.

Production Blockers / QA Watchlist

- Friend-celebration to comparison-card auto-transition uses 2000ms timeout; verify pause-resume behavior under tab switch.
- Validate muted-state handling for idle-hint VO (should remain silent while muted).
- Run full manual freeze pass for all child auto-advance and modal-restore paths.

SCENE 21 - DREAMS AND WISHES (ObstacleRemoverGame.jsx)

Phase Map

- intro
- wish1-intro -> wish1-active -> wish1-complete
- wish2-intro -> wish2-active -> wish2-complete
- wish3-intro -> wish3-active -> wish3-complete
- all-wishes-complete -> dream-drawing -> dream-clouded -> dream-clearing -> dream-revealed
- comparison-card -> ending -> complete

Reload Behavior - Restart/Recovery Pattern

- If drawing modal is open, reload routes to all-wishes-complete with 3s resume popup and restarts drawing flow.
- Intro phases (wish1/2/3-intro): reload keeps intro and replays setup with resume popup.
- Active phases: wish1-active reload jumps back to wish1-intro with counter reset.
- Active phases: wish2-active and wish3-active reload restart active phases with counters/state reset.
- dream-clearing mid-progress can reset trunk taps to restart clearing cleanly.
- Resume popup duration is 3000 ms where applicable.

Tab-Switch Behavior

- Uses usePauseAwareTimeout.
- onHide: stops VO, pauses celebration, clears phaseVoiceRef.
- onShow: resumes celebration; VO return handling is coordinated through voice guidance flow.
- Resume delay is 3000 ms.

Idle Hint System (Status: Partial)

- Primary hint levels are active in wish1-active, wish2-active, and wish3-active.
- Per-wish levels progress from none to visual cues to VO cues.
- IDLE_HINT_DELAY_MS is 15000ms for scene reminder behavior.
- markInteraction and phase changes reset idle timers and flags.

Hooks Used

- useVoiceGuidance (idleTimeout=20s, resumeDelay=3000ms, enableMusic=true)
- usePauseAwareTimeout
- useResumeCountdown
- useGameSounds
- useGaneshaVoice
- useAudioPreference

VO Checklist (Core)

- Scene intro
- Wish 1 intro/active/complete
- Wish 2 intro/active/complete
- Wish 3 intro/active/complete
- All-wishes-complete transition line
- Dream drawing/clouded/clearing/revealed lines
- Comparison card and ending lines

Asset Audit

- Wish icon pack and world/heart/star set.
- Wish 1 earth states, Wish 2 bowl/plate states, Wish 3 forest progression backgrounds.
- Wish1 action bubbles (kind and unkind sets).
- Wish2 draggable foods and placement positions.
- Dream background, cloud, and shared companion assets.

Production Blockers / QA Watchlist

- Verify bubble spawn behavior across reload/tab-switch for overlap or duplication artifacts.
- Verify drag/drop behavior when tab-switch happens mid-drag.
- Confirm dreamRevealed/trunk state persistence expectations at reload boundaries.
- Validate audio mute/unmute transitions while queued VO is pending.
